## Cover Letter

I'm a full-stack web developer with a passion for crafting innovative solutions. I possess solid experience in backend development with PHP and Laravel, and frontend development using Vue and Nuxt. Furthermore, I've been exploring mobile development with Flutter and I'm interested in emerging technologies such as blockchain. I'm confident that I can contribute to your development team with robust and scalable code.

---

## Experience

### Jukebox.Ag

Remote

Medium Full Stack Developer

Apr. 2023 - Oct. 2024

- I migrated the project from Vue 2 + Vuetify to Vue 3 + Tailwind CSS, refactoring the code to the new project structure;
- I developed and implemented APIs RESTful using the Laravel framework to integrate systems and support new features;
- I migrated the project from Firebase/Firestore to Supabase, optimizing the data architecture and reducing latency in queries. This change allowed a better performance and scalability for the system;
- I developed a serverless email sending solution, using Lambda, SES, DynamoDB and EventBridge Schedule;
- I developed integrations with PayPal and Asaas, developing custom payment flows for the platform;
- I managed and mentored a two-developer team, delegating tasks and providing technical support.

### Jukebox.Ag

Remote

Junior Full Stack Developer

May 2021 - Apr. 2023

- I developed and implemented APIs RESTful using the Laravel framework to integrate systems and support new features;
- Collaborated on bug correction, using Jira to track and manage issues;
- Translated user interfaces from Figma to functional code, using Vue.js as the front-end framework.
